1 row		

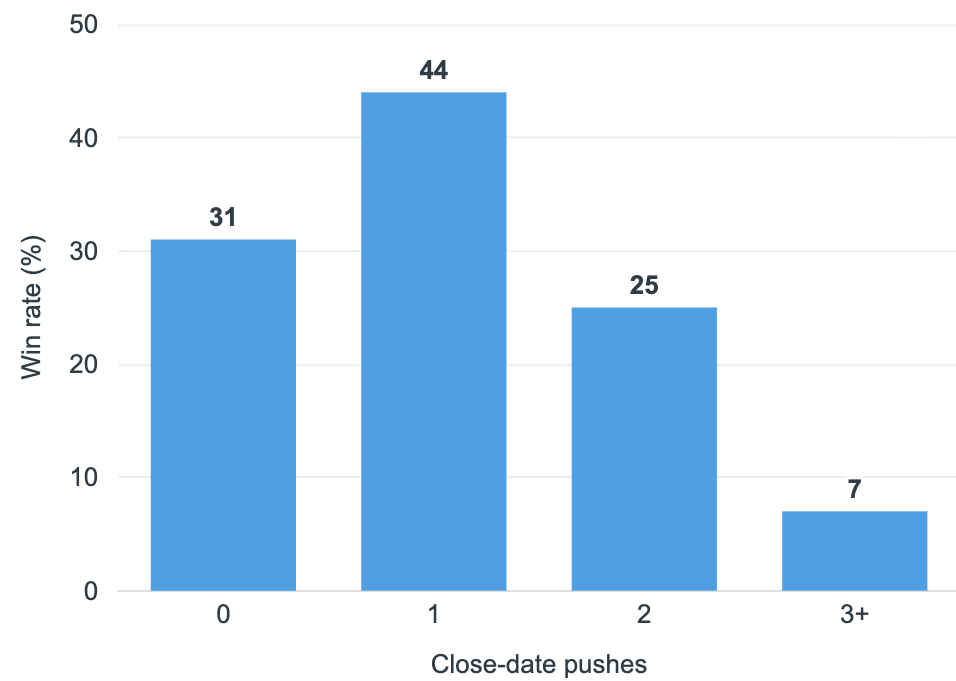

Quota attainment by quarter

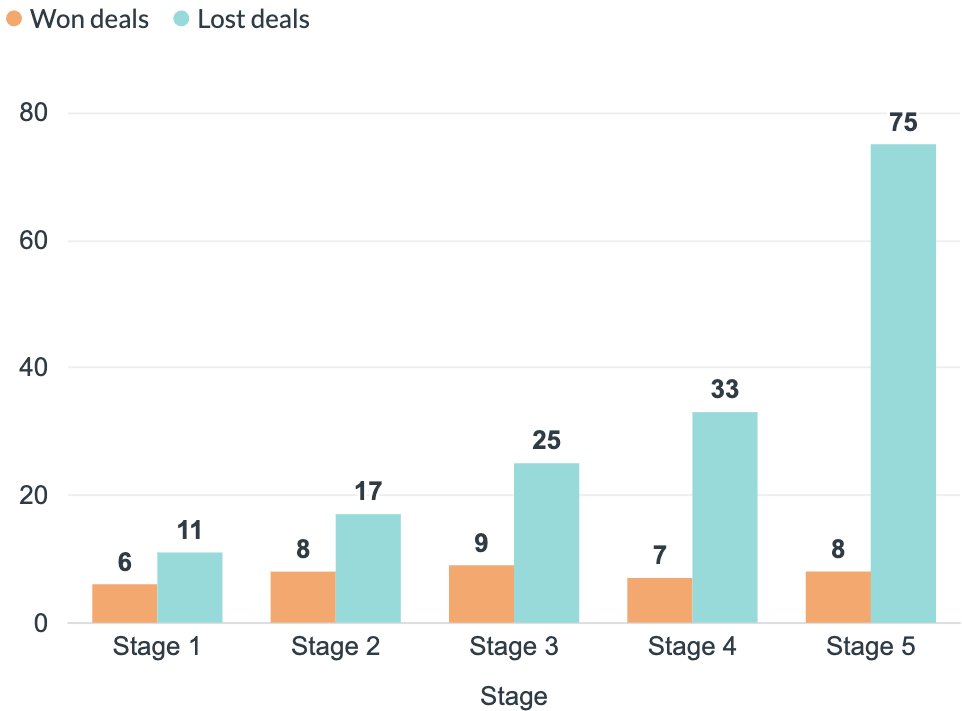

Coverage at quarter start

Win rate by number of close-date pushes

Days in stage: won vs lost deals

Key findings

- Pipeline coverage has fallen from 5.4x to 2.3x as quota doubled; only the 5x quarter hit target.
- Won deals move through each stage in about a week; lost deals stall for weeks.
- Deals pushed 2+ times rarely close (7% after 3+ pushes).
- Rep calls run 20–24% high mid-quarter; a simple model stays within 10%.
- This quarter: model expects about €8.1M vs €8.2M quota (reps call €8.5M).
